KEY ACCOMPLISHMENTS

- Spearheaded the **transition from a monolithic architecture to microservices**, enhancing system scalability and reliability.
- Enforced OAuth 2.0 and JWT for secure authentication, enhancing the application's security posture and compliance with industry standards.
- Designed and developed RESTful APIs for a key enterprise application, which integrated with multiple third-party services and **supported 1 million+ API requests per day, ensuring high availability and scalability**.
- Implemented Docker, Kubernetes and (CI/CD) pipeline to streamline application deployment, resulting in a **60% increase in deployment efficiency** and **enhancing overall workflow automation**.

TECHNICAL SKILLS

Skills: Java (9 years), Spring Boot (3years), Microservices (3 years), SQL (4 years), React JS, HTML, CSS, JS, AWS, Kafka, Git, Postman, Couchbase, Gradle, Docker, Kubernetes.

Certifications: AWS Certified Cloud Practitioner, AWS Certified Developer Associate

WORK EXPERIENCE

Application Developer | IBM India Private Ltd

January 2022 – Present

Client – American Express (Domain – Financial Services)

Technologies: Java, Spring Boot, Microservices, Vertx, SQL, Couchbase, DevOps, Kafka, Postman.

- Contributed to all phases of the software development lifecycle, including analysis, design, implementation, testing, and deployment, ensuring timely and high-quality deliveries.
- Collaborated with Product Managers, QA, and DevOps teams to ensure seamless integration and feature delivery, **reducing post-release defects by 25%**.
- Developed and maintained technical documentation for system architecture, APIs, and technical workflows, ensuring clear communication across teams and reducing onboarding time for new developers by **25%** while improving cross-team alignment and collaboration.
- **Developed and maintained microservices architecture**, improving system scalability by **35%** and ensuring long-term maintainability, resulting in a **20% reduction in downtime** and faster deployment cycles.
- Engineered and managed **RESTful APIs using Vert.x with Microservices** to support front-end and mobile applications, **improving response times by 30%** and enabling seamless integration across platforms.
- Implemented unit testing with Mockito and PowerMock to ensure code quality, reliability and potential bugs.
- Sustained code integrity using Git for version control while facilitating efficient collaboration across development teams, and led code reviews to mentor junior developers, driving quality and best practices.

Senior Process Associate | *Tata Consultancy Services, India* Client – Sainsburys (Domain – Retail)

December 2017 – January 2022

Technologies: Java, Spring Boot, Microservices, React JS, SQL, Unix Shell scripting, DevOps, AWS, Kafka, Postman

- Collaborated with the functional team to gather and understand business and technical project requirements.
- Built and maintained RESTful APIs using Spring Boot, improving data flow and service modularity, contributing to a **25% increase in application efficiency**.
- Organized code reviews that led to a **40% reduction in code defects** and improved overall code quality.
- Created technical documentation for design, development, and deployment, **reducing onboarding time by 20%**.
- Conducted thorough testing and debugging, ensuring high-quality deliverables and achieving nearly bug-free application releases.
- Employed **DevOps practices** to streamline development workflows and improved deployment efficiency.
- **Strengthened application security** with OAuth 2.0 and JWT, ensuring data protection and compliance with industry standards.
- Executed code refactoring and performance tuning strategies that resulted in a **20% improvement in load times** for key applications.

Java Developer | *BrTech, India*

August 2015 – December 2017

Technologies: Java, Struts, HTML, CSS, jQuery, JavaScript, SQL, Spring Core MVC, Eclipse, Docker, Kubernetes

- Collected project requirements to deliver customized, user-centric solutions, enhancing client satisfaction.
- Built and optimized CRUD operations in Struts applications, enhancing efficient data management and improving interaction with back-end systems.
- Proactively troubleshoot and resolved performance bottlenecks, bugs, and production issues in a timely manner, enhancing application uptime and reliable functionality.
- Automated deployment processes using Jenkins, Docker, and Kubernetes, reducing manual efforts and **resulting in a 20% reduction in deployment times**.
- Constructed dynamic web applications and generated responsive UIs using HTML5/CSS3, JavaScript ensuring an intuitive user experience.
- Utilized Git for version control, **reducing merge conflicts** and **improving team collaboration**.
- Applied automated testing methodologies using JUnit and Mockito for unit, integration, and end-to-end testing, leading to a **50% reduction in testing time** and ensuring high-quality releases.

EDUCATION

PG Diploma in Software Development | CDAC, India

Feb 2015 - Aug 2015

Bachelor of Engineering in Computer Science and Engineering | Anna University, India

Aug 2010 - Apr 2014
